## **CAMGT BOX TYPE G II**

## ADVANTAGES

- Good availability and reliability
- Better fuel efficiency leads to lower CO2 emissions per MWh, when using EPA grades
- Hydrophobic EPA grades limit degradation such as fouling and corrosion
- Suitable for harsh environments
- Static air filter with long life and low initial and stable pressure drop
- Easy mounting
- Fully incinerable

Pre- or final filter for gas turbines, large industrial air compressors, diesel & gas engines, generators & enclosures, wind turbines   Frame Plastic molded;ABS   Gasket Polyurethane, endless foamed   Media Glass fiber   Separator Hot-melt Separator Technology   Sealant Polyurethane   Grille, Downstream Support grid for filtermedia   Rec. final pressure drop 600 Pa   Max airflow 1.3 x nominal flow   Max Temperature (°C) 70°C   Relative Humidity max 100%   Installation Options In a separate bank, from the upstream or downstream sides.   Additional information: XL version available on request. Profile placed at 292 mm depth for clamping, i.e for fastener spring type C-80.   Additional product features: Ensures water drainage

Comment Additional product features: Ensures water drainage High filtration efficiency Low pressure drop also in wet conditions Resistant to turbulence and high pressure drop Easy mounting Water-resistant media	Sealant	Polyurethane				
Max airflow 1.3 x nominal flow   Max Temperature (°C) 70°C   Relative Humidity max 100%   Installation Options In a separate bank, from the upstream or downstream sides.   Additional information: XL version available on request. Profile placed at 292 mm depth for clamping, i.e for fastener spring type C-80.   Additional product features:   Ensures water drainage   High filtration efficiency   Low pressure drop also in wet conditions   Resistant to turbulence and high pressure drop   Easy mounting   Water-resistant media	Grille, Downstream	Support grid for filtermedia				
Max Temperature (°C) 70°C   Relative Humidity max 100%   Installation Options In a separate bank, from the upstream or downstream sides.   Additional information: XL version available on request. Profile placed at 292 mm depth for clamping, i.e for fastener spring type C-80.   Additional product features:   Ensures water drainage   High filtration efficiency   Low pressure drop also in wet conditions   Resistant to turbulence and high pressure drop   Easy mounting   Water-resistant media	Rec. final pressure drop	600 Pa				
Relative Humidity max 100%   Installation Options In a separate bank, from the upstream or downstream sides.   Additional information: XL version available on request. Profile placed at 292 mm depth for clamping, i.e for fastener spring type C-80.   Additional product features:   Ensures water drainage   High filtration efficiency   Low pressure drop also in wet conditions   Resistant to turbulence and high pressure drop   Easy mounting   Water-resistant media	Max airflow	1.3 x nominal flow				
In a separate bank, from the upstream or downstream sides.   Additional information: XL version available on request. Profile placed at 292 mm depth for clamping, i.e for fastener spring type C-80.   Additional product features:   Ensures water drainage   High filtration efficiency   Low pressure drop also in wet conditions   Resistant to turbulence and high pressure drop   Easy mounting   Water-resistant media	Max Temperature (°C)	70°C				
Additional information: XL version available on request. Profile placed at 292 mm depth for clamping, i.e for fastener spring type C-80.   Additional product features:   Ensures water drainage   High filtration efficiency   Low pressure drop also in wet conditions   Resistant to turbulence and high pressure drop   Easy mounting   Water-resistant media	Relative Humidity max	100%				
Comment Placed at 292 mm depth for clamping, i.e for fastener spring type C- 80. Additional product features: Ensures water drainage High filtration efficiency Low pressure drop also in wet conditions Resistant to turbulence and high pressure drop Easy mounting Water-resistant media	Installation Options	In a separate bank, from the upstream or downstream sides.				
Water-resistant media	Comment	placed at 292 mm depth for clamping, i.e for fastener spring type C- 80. Additional product features: Ensures water drainage High filtration efficiency Low pressure drop also in wet conditions Resistant to turbulence and high pressure drop				
		Water-resistant media				

CamGT Box Type G is a high-capacity filter for turbomachinery. Thanks to the unique design, its performance is maintained in humid or wet conditions, guaranteeing a long lifetime and a good filter economy.
